

We encourage our landlords to consider letting their properties to tenants with pets.

We welcome tenants that are looking to find a home for themselves and for their little friends. We give valuable advice and at the same time help landlords to manage their property.

By welcoming tenants with pets, landlords substantially increase demand for their property, and attract very responsible tenants who may stay longer and look after the rented property even more than those without pets, as its still more difficult to find rented accommodation that allows pets.

We are more than happy to discuss letting to tenants with pets and to give you all the information for your own consideration.

All tenants keeping pets must complete our Pet Information Form to provide the details such as; type of pet, name, and contact details for their registered veterinary practice.

At the end of the tenancy, we offer tenants to arrange for pest cleaning themselves otherwise it can be arranged by the agents and the costs are covered by the tenants.

Pet Policy

To get on the same page with your tenants and to share your expectation, it is a good practice to use a Pet Policy which can be found below:
